Purpose of Document:

Gas leaking causes a number of mishaps that cause property damage and human injuries. Based on their physical characteristics, such as toxicity, flammability, etc., the risk of explosion, fire, and asphyxia exists. In recent years, there have been more fatalities related to gas cylinder explosions. Testing this project results in a dependable performance and identifies both its strengths and weaknesses. The purpose of the text must be properly analyzed. Giving the value after taking all the parameters.

Defect Analysis:

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved.
